PROJECT PROFILE

PROJECT: JB Chemicals & Pharmaceuticals Ltd - Floor & Wall Protection
LOCATION: India

THE PROBLEM

JB Chemicals & Pharmaceuticals Ltd (JBCPL) is one of India's fastest growing pharmaceutical companies and is the flagship of the Unique Group.

JBCPL required high performance coating systems for the floors and walls of its corridors and production areas, which totalled 8,000m².

THE SOLUTION

The wall surfaces were prepared and primed with Uni-Tech GP Primer prior to the application of Wall-Tech UV.

Wall-Tech UV is a two component, water-based polyurethane coating that provides a hygienic, seamless finish with outstanding chemical and abrasion resistance, as well as superior gloss and colour stability.

Our solvent-free epoxy self-levelling screed Floor-Tech XSL was applied to re-level and refurbish the floor areas. Floor-Tech XSL provides the optimum level of abrasion, impact and chemical resistance. It also exhibits the ultimate application and levelling properties.
